

Question Bank

(2 marks questions)

- Q.1. What is Parallelism and why is it important ?
- Q.2. Explain Decomposition Techniques in parallel computing.
- Q.3. List levels of Parallelism.
- Q.4. Distinguish between Uniform Memory Access (UMA) and Non-Uniform Memory Access (NUMA).
- Q.5. What are the characteristics of Tasks?
- Q.6. List different methods for containing Interaction overheads.
- Q.7. Explain Performance Metrics for Parallel Systems.

(5 marks questions)

- Q.1. Explain with suitable diagrams SIMD, MIMD architecture.
- Q.2. Explain Memory Access in Detail.
- Q.3. Explain Parallel Algorithm Models.
- Q.4. Explain Mapping Techniques for Load Balancing.
- Q.5. Write a note on Communication cost in Parallel Machines.
